

PLASTIVAN

UV- stability Warranty

UV- stability
10
Years
Warranty

Based on the official warranty Plastivan NV gets from their suppliers there is a 10 year warranty on UV- stability on following colors:

RAL 9010 – RAL 9001 – RAL 1015 - RAL 7035.

This stands for a warrant that none of the products will discolor in an excessive way due to UV-radiation.

The warranty is valid for 10 years after date of installation, but only if the following specifications are uphold:

- * Placement in Northern European climate (<100KLY).
- * Installation according to the installation manual, supplied by Plastivan NV.
- * The products aren't exposed to temperatures above 40°C.
- * Plastivan NV has to be able to examine the premises.

The responsibility of Plastivan NV is limited to the replacement of the products and can't be held liable for any installation costs.
